

# Project Summary

**Project:** Tudek Park

**Client:** Ferguson Township, Centre County, PA

Tudek Park began as a 60 acre piece of undeveloped farmland. Through local philanthropy, this strategically located tract was acquired by Ferguson Township. The Township envisioned a regional park providing both active and passive recreational activities. The Township retained the master planning services of Battaglia and Jones, Landscape Architects. Uni-Tec was retained to design park facilities for park active areas as generally indicated on the master plan. Facilities include vehicular and pedestrian access, parking, and drainage and stormwater controls. In addition, Uni-Tec designed the picnic pavilions, a restroom and maintenance equipment facility, soccer and baseball fields, a basketball court, and a playground area. Today the park is a regional facility that is immensely popular and widely used by the community.
